

THE SUFFICIENCY BAR

Fully treated, the two types remain separate bands

Within-type distributions at each pure-type level; the shaded bands are the middle half of like areas

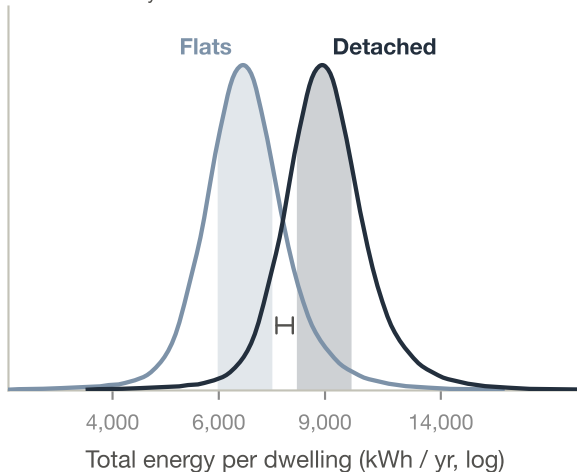

Per dwelling

bands meet only at the central 85% of areas

At equal household size

bands meet only at the central 68% of areas

178,353 English Census 2021 Output Areas. Metered DESNZ energy, NTS-anchored car travel, cityseer network access. Compositional pure-type estimates unless noted.
